Design Analysis Report for Contact Duplicating and Reseau Printer

Gentlemen:

Reference is made to the subject Design Analysis for Printer No. 1, submitted to this office under date of 27 October 1964.

Evaluation of all aspects of the Design Analysis by our Technical Representative indicates general acceptability with the exception of Paragraphs 2.1 and 2.11 which appears to take exception to the requirement that incremental control of exposure along the length of the frame be included as set forth in Paragraphs 3.8 and 3.9 of the Purchase Description for Contact Duplicating and Reseau Printer, dated 14 February 1964, which is included under the "SCOPE OF WORK" clause in the subject Contract.

Exposure control of the type described above is a firm requirement under the contract and it is, therefore, requested that the subject Design Analysis Report be revised to include the incremental control of exposure in such form as to completely satisfy all technical design requirements.

Very truly yours,

Declass Review by NGA.
